

# How to deal with Urine and Vomit

 **Fragranced** to mask strong odours  
 **Or... Fragrance Free** for sensitive homes, kennels and aged care centres.

As much as we love them, it's certainly going to happen. That damp patch on the carpet, or small "deposit" on the floor, is frustrating for all pet owners, parents and carers alike!

Fortunately, we have the solution! We can't stop the accidents, but we can help with the cleanup. Our good bacteria based product called UV Clean is perfect for these situations

## Kids and Pets!

If you're a pet owner you know the difficulties of dealing with the natural bodily functions of indoor... and outdoor pets.

Once a dog or cat has made a deposit (urine, vomit or faeces) on the carpet in a particular area (usually the best rug!) they will continually return to the scene of that "crime" no matter how much scrubbing and deodorising is done!

The reason is mostly that the uric acid in a pet's urine or stomach acids in vomit is very difficult to eradicate. Hot soapy water generally just pushes the ammonia and acids down into the fibres of the carpet or into the substrate below. The area of the carpet may smell fine for a few days but the next humid day will reactivate the acid crystals and bring back the smells. A dog or cat has the ability to sense odours more easily than us so they go back to the same place to "do their business".

## HOW BACTERIA HELPS

UV Clean's high concentrations of specially selected beneficial bacteria get down deep into the fibres and substrate and consumes the organics that perpetuate the odours.

The only way to permanently remove the odours is to eat away the residue with a product containing bacillus bacteria such as Septic Science UV Clean.

Full of good bacteria UV Clean is unlike any other cleaner on the market! UV Clean contains billions of friendly bacteria, scientifically proven to breakdown organic matter into simple organic compounds, found naturally in the environment. On contact, our bacteria work like an efficient army of cleaners on messes, stains and odours, getting to work straight away producing enzymes to break down the organic matter that cause problems, feeding on the waste particles and digesting the organic matter, all the while multiplying, producing enzymes and feeding until the stains & odour have gone.

## A NATURAL SOLUTION

Containing no chemicals, this is the perfect cleaner for homes, vehicles, Catteries, Kennels, Child Care Centres and Aged Care Centres. It comes in either a fragranced or unfragranced version to suit different environments and applications. When the food source has been depleted this friendly bacteria will die back to natural levels.

## HOW TO APPLY

UV Clean works best when the mess is still fresh. Scoop up any solids and moisten the affected area firstly with clean water then spray with UV Clean. Cover the sprayed area with a damp cloth or towel and leave for at least 6 hours. Reapply for older stains and odours or if the area has dried out sooner than 6 hours. For outdoors cover with cardboard or tarp to keep the area damp until the bacteria has time to work. Heavily stained carpets should be cleaned with hot water extraction without the use of detergents or rinse agents. Then spray with UV Clean when still wet ensuring baseboards are also treated. Allow to air dry.

**NOTE: THE MORE SLOWLY THE PROCESS WORKS, THE LONGER THE CLEANING EFFECT WILL LAST.**

**DO NOT CROSS CONTAMINATE WITH ANY CHEMICALS AS THIS WILL KILL THE BENEFICIAL BACTERIA COMPONENT.**

## Removes stains and odours caused by:

- Animal and human urine and sweat
- Vomit, blood, faeces and other bodily fluids
- Tea, coffee, milk, orange juice, cordial and soft drink
- Mould

**SHAKE WELL BEFORE USE**

## Ideal for use on:

- Carpets, underlay, mattresses, curtains and fabrics.
- Concrete, brick and wood.
- Furniture, walls, wood and tiled floors.
- Urinals and grout.
- Synthetic grass, artificial turf.
- Great to remove uric acid crystals from composting toilet urinals.

**CHECK FOR COLOUR FASTNESS**

## ENVIRONMENTALLY SAFE

UV Clean contains no harmful chemicals and is completely safe in sensitive environments.

## NON-FLAMMABLE - NON HAZARDOUS

**Contains Bio-Natural Bacillus Bacteria - CHEMICAL FREE  
DO NOT SPRAY DIRECTLY ON PETS, PLANTS OR PEOPLE**

The surfactants and bacteria in UV Clean are readily bio-degradable according to the Australian Standards AS4351. For more information refer to the MSDS available on our website.

## CAUTION: KEEP OUT OF REACH OF CHILDREN.

**If in contact with EYES - Rinse thoroughly with water.  
SKIN - Rinse with soap and water. IF SWALLOWED - Do NOT induce vomiting or give anything by mouth. Seek immediate medical attention or contact the Poisons Information Centre on 13 11 26. Immunocompromised people should avoid contact with UV Clean.**

**125ml Travel Pack**  
with lockable spray head

**500ml Home Spray**

**1 Litre Travel Pack Refill**  
comes with free 125ml or 500ml empty spray bottle

**5L Bulk Pack**  
comes with 2 x 500ml empty spray bottles  
or  
1 x 500ml + 1 x 125ml empty spray bottles
