

# Chemical Free Cleaning & Deodorising

We are increasingly dependant on chemical cleaners for commercial and household situations.

Wouldn't it be good to clean with a conscience?

Septic Science's BioSpray is an all-in-one spray cleaner and deodoriser. Made on only good bacillus bacteria that go to work on dirt and stains on contact. This product has a light lemon fragrance.

Perfect to clean glass, mirrors, floors, showers, bathrooms, toilets, ovens, BBQ's and kitchen benchtops and much more.

The Bio Spray cultured bacteria digest organic matter such as urine, blood, soap scum, grease, fats and molds by creating digestive enzymes that help bio-degrade complex compounds. Most impressively, the bacteria work upon application.

This is an everyday cleaner you can use at home or work. It replaces a lot of cleaners on the market and contains no harsh cleaning chemicals, and being based on good bacteria is completely safe, and recommended for use in septic and wastewater treatment systems.

Additionally, this is a biodegradable product that does not have a dangerous goods classification and or pose risk in terms of materials handling and transport. 2 year shelf life even when diluted.

## HOW BACTERIA HELPS

Bio Spray's high concentrations of specially selected beneficial bacteria is the perfect cleaner for not only sensitive eco-systems but also home and commercial areas.

## DOSING RATES

Mix different strength bottles for use around the house.

20:1	<b>Single Strength</b> for light household cleaning - glass, mirrors, benchtops etc.	25ml BioSpray Concentrate with 475ml Fresh Water
10:1	<b>Double Strength</b> for floors, showers and bathrooms	50ml BioSpray Concentrate with 450ml Fresh Water
5:1	<b>Extra Strength</b> for BBQ's, laundries, ovens	100ml BioSpray Concentrate with 400ml Fresh Water
1:1	<b>Super Strength</b> for stubborn cleaning	250ml BioSpray Concentrate with 250ml Fresh Water

Comes in "Ready-to-Use" Spray Bottles or "Mix Yourself" Concentrates

SHAKE WELL  
BEFORE USE

## TIPS AND TRICKS

Always add water to your mix bottle prior to adding BioSpray Concentrate.

**Windows** - spray with BioSpray, wipe with wet cloth and dry with microfibre cloth for streak free finish.

**Stainless Steel** - Remove fingerprints and tannins from sinks and stainless steel appliances - Everything will shine with BioSpray!

**Bathrooms** - Use creme cleansers (e.g. Jiff) for toilets and tiles for that "once-a-week" soap scum removal, then polish with BioSpray as required during the week.

**Shower Screens** - Use a citrus based cleaner (e.g. Shower Power) for easy soap scum removal from glass then polish with BioSpray as required during the week.

**Ovens and BBQ's** - Wait till cool then spray liberally with BioSpray and wait overnight and wipe clean with damp cloth. May need extra applications for baked-on residue.

**Caravans** - Use as your main cleaner throughout the caravan eg: Kitchen Toilet, Shower etc. This will limit any chemicals being introduced into your drain-lines that may damage the ecosystem (bacteria) in the toilet and greywater holding tanks.

**Grout** - For stubborn urine stains and odours use **Septic Science UV Clean Spray**. See over.

## SEPTIC & ENVIRONMENTALLY SAFE

Will not harm the bacterial activity in septic tanks and has no adverse effect on the environment. Safe to use in all household and commercial cleaning situations and is non-caustic containing no harmful chemicals.
