**HIGH
PERFORMANCE
SEPTIC
APPROVED**

**Available
in 20, 50,
100, & 200
Block Packs**

Contains FAST acting good bacteria!

UV BLOX **URINAL BLOCKS**

- **Eliminates Odours**
- **Cleans Urinal Bases**
- **Deodorises As It Cleans!**

Septic Science UV Blox contain high concentrations of powerful beneficial bacteria for use in urinals attached to septic and aerated wastewater treatment systems.

The *UV Blox* bacteria produce enzymes to digest and remove uric salts, sludge and scale preventing offensive odours and blockages in urinals. Once the water soluble block is placed into the base of the urinal the bacteria take care of the cleaning. Unlike chemical based blocks, UV Blox break down urine and related waste products to water and basic minerals. Adds good bacteria to your septic system.

For best results, clean the urinal surfaces with *Septic Science Bio Spray surface spray cleaner*.

**HIGH
PERFORMANCE
SEPTIC
APPROVED**

**Available
in Mini, Small
Medium &
Large Blocks**

Contains FAST acting good bacteria!

GT BLOX **GREASE TRAP BLOCKS**

- **Eliminates Odours**
- **Cleans Grease Trap Chambers**
- **Deodorises As It Cleans!**

Septic Science GT Blox contain high concentrations of powerful beneficial bacteria for use in domestic and commercial grease traps attached to septic and bio systems. The *GT Blox* bacteria produce enzymes to digest the fats, oils and greases preventing offensive odours and blockages in grease traps. Adds good bacteria to your septic system and can reduce trade waste costs.

Once the water soluble, wax based block is suspended into the inflow path, the bacteria take care of the grease digestion. Unlike chemical based blocks, *GT Blox* break down grease and foodstuffs and related waste products to water and basic minerals that have no effect on septic system operation. For best results, clean commercial kitchen surfaces with *Septic Science Bio Spray surface spray cleaner*.

**WASTEWATER
SYSTEM
REJUVENATOR &
DRAIN CLEANER!**

**Available
in 2kg,
5kg, 10kg
Packs**

Contains FAST acting good bacterial!

**ELIMINATES
SLIME, ALGAE &
MOST FLOATING
WEEDS FROM
DAMS**

SEPTIC CLEAN

SEPTIC SYSTEM REJUVENATOR

- **Eliminates Odours**
- **Cleans Greasetraps & Drains**
- **Reduces Sludge Levels**
- **Reduces Pump-out Frequency**
- **Extends The Life Of Trenches**

Septic Clean contains high concentrations of powerful beneficial bacteria for use in waste water systems (septics and treatment systems) to digest organic matter. Once introduced into the system the bacteria keeps multiplying until all of the food source (waste material) is consumed. Rejuvenates sluggish systems and manages overloading of known contaminants e.g. milk, coffee, juices, alcohol and most chemicals. **Your consultant can advise how to dose your system to control peak-time bacterial flushing and down-time bacterial starvation.**

DAM CLEAN

DAM & MANURE POND CLEANER

- Safely removes odours, algae & sludge**
- **Chemical and herbicide free**
 - **Safe for fish and livestock**
 - **Also Dam Clean Plus for leachates**

Dam Clean contains high concentrations of powerful beneficial bacteria for use in cleaning and maintaining dams. This good bacteria eats away any suspended solids, sludge and decaying organic matter including manure. As nutrient levels decrease, algae will die back and sink to the bottom to be slowly consumed by the bacteria creating a natural cleaning cycle, leaving the water condition excellent for stock watering and irrigation.

Dam Clean has proved to be the most cost effective and ecological solution for dam remediation. Perfect for de-sludging lined dams, preventing crusting of dairy effluent dams and settling ponds.

**CLEAN UP AFTER
KIDS, CATS, DOGS
OR ANY LIVING
THING!**

**Available
in 500ml,
2.5Lt, 5Lt
20Lt Bulk**

Contains FAST acting good bacterial!

**ALL PURPOSE
SURFACE SPRAY
CLEANER**

**Available
in 500ml
pre-mixed,
1lt, 5lt & 20lt
concentrate**

Contains FAST acting good bacteria!

UV CLEAN

URINE & VOMIT CLEANER

Removes stains and odours caused by:

- Animal and human urine and sweat
- Vomit, blood, faeces, bodily fluids
- Tea, coffee, milk, fruit juice, cordials
- Mould

UV Clean's high concentrations of specially selected beneficial bacteria get down deep into the fibres and substrate and consumes the organics that perpetuate the odours.

The only way to permanently remove the odours is to eat away the residue with a product containing bacillus bacteria such as Septic Science UV Clean

BIO SPRAY

SEPTIC SAFE SPRAY CLEANER

- Eliminates odours and stains
- Keeps working after application
- Reduces pipe blockages
- Mix stronger for tough cleaning

A general purpose spray cleaner perfect to clean glass, mirrors, floors, showers, bathrooms, toilets, ovens, BBQ's, kitchen benchtops and stainless appliances.

The Bio Spray cultured bacteria digest organic matter such as urine, blood, soap scum, grease and fats by creating digestive enzymes that help bio-degrade complex compounds. This is an everyday cleaner you can use at home or work. It replaces most surface spray style cleaners on the market and contains no harsh cleaning chemicals! Adds good bacteria to your septic system.
